Statement by the employer to the LMRA of the ratio of Bahraini to expatriate employees, the vacancies reserved for Bahraini nationals and the work permits requested in the current period. The Bahrainisation rate is the number of Bahraini employees divided by the total number of employees, expressed as a percentage, and is calculated per employer and per sector according to the LMRA classification. A rate below the sector requirement increases the monthly levy on each work permit by **BHD 10** and may lead to a refusal of new permits.
